

Integration Point to Present ACE Information at AAEI

Charlotte, NC, January 16, 2008 -- Integration Point's VP of Products & Strategy, Melissa Irmen, will participate as an invited speaker at the upcoming American Association of Exporters and Importers (AAEI) Western Regional Conference in Newport Beach, CA January 20-22, 2008. As a Trade Ambassador to the US Customs and Border Protection (CBP), Irmen works closely with CBP advising the agency of the needs of the trade in the creation of CBP's Automated Commercial Environment (ACE) system. ACE is the commercial trade processing system being developed by CBP to facilitate legitimate trade and strengthen border security. At the conference, Irmen will co-present with Michael Maricich from the Cargo Systems Program Office at CBP. Their presentation is entitled, "A1/A2 ACE Overview and Post Summary Corrections" and will provide a status of ACE development as well as discuss how this new system will impact the way in which the trade performs post summary activities such as corrections, reconciliation and protests. This presentation is helpful for all filers and importers that want to understand forthcoming changes in summary filings.

About Integration Point, Inc.

Integration Point™, Inc.'s Real Time Global Trade Management™ helps many of the best known companies import and export goods more effectively by providing up-to-date international trade compliance. Integration Point's solution is a comprehensive suite of fully integrated, web-based software products that provide consistent and secure access to information around the clock including: Global Classification, C-TPAT, AEO, Denied Party Screening, Free Trade Agreement qualification and Duty Deferral Program participation. Companies dependent on the efficient import/export of goods rely on Integration Point to help them quickly and accurately navigate through the often complex and dynamic requirements of global trade.
