

Free Entry Visibility White Paper, Tips Sheet and Tutorial

Charlotte, NC, April 22, 2009 -- [Integration Point](#)®, a trade compliance software provider, made available today a set of free entry visibility educational materials including a self-running tutorial, white paper, and tips sheet. The white paper, *Closing the Loop with Entry Visibility*, provides information on global trade challenges (compliance, complexity, credentialing, and confirmation), global trade opportunities (duty, processing and compliance savings) and how an entry visibility solution closes the loop.

According the Michael Lamoureux of the Sourcing Innovation blog, “A key component of trade visibility is entry visibility. An entry visibility solution allows a company to manage the trade compliance process associated with the import of goods that starts when they leave a foreign supplier’s warehouse and ends when they reach their (initial) destination.”

The Integration Point materials describe not only what entry visibility is, but how and why it can help companies save money and avoid potentially costly liabilities.
