

The Global Standard for Duty Management Programs such as Customs Warehouse & Processing under Customs Control

Ready to get rid of the paper-hassle for filing declarations to Customs? Do you need a better audit trail and reporting mechanisms for duty management programs? With Integration Point Customs Warehouse/Processing under Customs Control (CW/PCC), not only can you eliminate paper and file directly with Customs, but you can also manage trade agreements, exports, Import Control System (ICS) requirements and more.

Integration Point CW/PCC Management

Integration Point understands the job of the Special Duty Regime operator and knows what tools are needed to manage requirements in a truly efficient manner. The Integration Point Customs Warehouse/Processing under Customs Control (CW/PCC) Management solution was developed by a team of industry experts that understands the job of the economic operator is to manage all trade regimes efficiently and maximize savings opportunities. The solution is built on a single, web-based platform utilizing Software-as-a-Service (SaaS) technology to allow for easy use of automated filing, reporting and management of any duty management regime in the industry.

Integration Point CW/PCC Management is more than just an automated solution for inventory reconciliation, Customs declaration filings, and reports on component balance audits or finished goods audits. Companies that utilize Integration Point CW/PCC also benefit from the combined power of using Integration Point Global Trade Management for trade agreement management, export management, harmonized schedule number look-up and validation, and ensuring that Import and Export Control System requirements are met.

Industry Knowledge

Integration Point CW/PCC Management is used by multi-national companies in all industries such as Automotive, Electronics, Pharmaceutical, Petroleum, Retail, Apparel and Footwear, Textiles and Aerospace. The Integration Point CW/PCC team has the most diverse set of industry skills in the market today.

Benefits of Automation

Regardless of industry or need, Integration Point CW/PCC Management provides companies with the necessary tools to meet Customs declaration requirements, create ad-hoc reports for internal analysis, and reconcile inventory on a daily basis. Integration Point CW/PCC enables Economic Operators who utilize these trade regimes to:

- Manage and complete all Simplified Frontier Declarations (SFD)
- Submit all necessary documentation (SFD, SDI, PSA, FSD, etc.) to Customs Authorities
- Create and link the Universal Consignment Reference (UCR) to every audit trail transaction
- Support common stocking procedures when commercially interchangeable goods are from different origins
- See true production tracking of controlled materials
- Execute queries and validation procedures that substantiate a trader's responsibility under Authorised Economic Operator (AEO)
- Handle origin certificate linking and aging in an automated fashion in order to solicit suppliers if a certificate is expired or soon will, or is missing all together
- Balance inventory and reconcile with ERP system data on a daily basis
- Correctly flag applicable goods within the regime for preference declarations
- Check HS numbers used for product classifications against current HS schedules from over 140 countries
